

DOUBLE BEAD CLAMPS™

DOUBLE BEAD CLAMPS™

Advantages

- ◆ **Double Bead Bands**

DOUBLE BEAD CLAMP™ bands concentrate sealing pressure, increasing performance compared to smooth liners. Between the beads an **elasticity-reserve** is created that has the same effect as an O-ring.

- ◆ **Full Liner**

DOUBLE BEAD CLAMPS™ full liners provide **360°** sealing pressure and prevent hose extrusion.

- ◆ **1/2" Bands**

DOUBLE BEAD CLAMPS™ are equipped with 1/2" bands to generate a **higher sealing pressure** and **higher residual torque** than 9/16" bands.

- ◆ **Flanged Edges**

DOUBLE BEAD CLAMP™ **flanged edge** bands protect soft hose compounds.

- ◆ **Stainless Steel**

DOUBLE BEAD CLAMP™ come with **stainless steel band, housing**. Screws are either zinc plated carbon steel or stainless steel

That's 5 reasons for choosing CONSTANT MOMENTUM CLAMPS™
